

Session 11 Quiz - The Art of Prompting

Track B | Grades 9–12 | 20 Questions

Q1 [Type: MCQ | Difficulty: Easy | QID : 53048]

A _____ is your instruction to an AI tool - what tells it what you want it to do.

- A. Constraint
- B. Response
- C. Prompt
- D. Framework

Correct Answer: C

Explanation: A prompt is the instruction you give to an AI tool - it is the input that tells the AI what you want it to do, and the quality of the prompt directly shapes the quality of the output.

Q2 [Type: MCQ | Difficulty: Easy | QID : 53062]

_____ prompting is a technique where you refine your AI interaction through multiple rounds of feedback rather than relying on a single attempt.

- A. Iterative
- B. Single-shot
- C. Overloaded
- D. Random

Correct Answer: A

Explanation: Iterative prompting follows four steps: write the prompt, get the AI response, evaluate the output, then refine and repeat.

Q3 [Type: MCQ | Difficulty: Easy | QID : 53066]

There is no single "perfect" way to write a prompt - the best prompt is the one that helps you get what you need.

- A. True
- B. False

Correct Answer: A (True)

Explanation: Use helpful elements when they make sense, iterate when you are not satisfied, and stay in control of the final output. The framework is a guide, not a rigid template.

Q4 [Type: MCQ | Difficulty: Medium | QID : 53069]

Once the AI gives you a response to your prompt, the correct workflow is to accept that first answer and move on without reviewing or refining it.

- A. True
- B. False

Correct Answer: B (False)

Explanation: "Accepting the first answer blindly" is named as one of the five common prompting mistakes. Iterative prompting - evaluating the output against your goal and refining the prompt - is what reliably turns a mediocre first answer into a usable one.

Q5 [Type: MCQ | Difficulty: Easy | QID : 53084]

Which of the following is one of the five components of the Prompt Framework ?

- A. Tone
- B. Constraints
- C. Visualization
- D. Reflection

Correct Answer: B

Explanation: The framework is Action + Topic + Context + Format + Constraints. The other options sound plausible but are not part of the framework as taught.

Q6 [Type: MCQ | Difficulty: Easy | QID : 53413]

Which of the following is a common prompting MISTAKE?

- A. Specifying your audience
- B. Using bullet points for the output
- C. Overloading the prompt with too many requirements at once
- D. Asking the AI to explain something simply

Correct Answer: C

Explanation: The five common mistakes are: assuming AI understands you, giving incomplete info, accepting the first answer blindly, overloading the prompt, and not checking output. A, B, and D are actually good practices.

Q7 [Type: MCQ | Difficulty: Medium | QID : 53416]

What is the correct order of the four steps in iterative prompting?

- A. Get AI response → Write prompt → Refine → Evaluate
- B. Write prompt → Get AI response → Evaluate the output → Refine and repeat
- C. Refine → Write prompt → Evaluate → Get response
- D. Evaluate → Refine → Write prompt → Get response

Correct Answer: B

Explanation: You write your best first prompt, see what the AI returns, evaluate it against what you actually needed, then adjust the prompt and try again. The cycle repeats until the output matches your goal.

Q8 [Type: MCQ | Difficulty: Medium | QID : 53419]

In the framework "Action + Topic + Context + Format + Constraints," which element answers the question "Who is it for and why?"

- A. Action
- B. Topic
- C. Context
- D. Format

Correct Answer: C

Explanation: Context tells the AI about the audience and purpose - e.g., "I'm a 5th grader who has never owned a pet before." Without it, the AI has to guess your level, your goal, and your tone.

Q9 [Type: MCQ | Difficulty: Medium | QID : 53421]

According to the GIGO rule, what is the likely outcome of providing a vague prompt to an AI?

- A.** The AI will produce a vague or irrelevant output.
- B.** The AI will refuse to answer until more details are provided.
- C.** The AI will automatically use its internal logic to fix the ambiguity.
- D.** The AI will generate highly creative results that exceed user expectations.

Correct Answer: A

Explanation: The Garbage In, Garbage Out (GIGO) rule states that poor input leads directly to poor or unclear results.

Q10 [Type: MCQ | Difficulty: Hard | QID : 53423]

Which component of a strong prompt specifies the target audience or the reason for the request?

- A.** Constraints
- B.** Context
- C.** Format
- D.** Clear Instructions

Correct Answer: B

Explanation: Context provides background information, such as who the audience is or the purpose of the interaction, to help the AI tailor its tone.

Q11 [Type: MCQ Scenario | Difficulty: Medium | QID : 53425]

Scenario: Aaliyah pastes a paragraph into ChatGPT with the prompt: "Make this better."

Question: Which mistake is she making, and which fix would help most?

- A. Overloading; remove the topic
- B. Not checking output; add Constraints only
- C. Assuming AI understands her; add a clear Action and Constraints
- D. Accepting the first answer blindly; add a Context only

Correct Answer: C

Explanation: "Better" means different things to different people - shorter, more formal, more exciting, more accurate. By not specifying, Aaliyah is assuming the AI knows what she means.

Q12 [Type: MCQ Scenario | Difficulty: Hard | QID : 53427]

Scenario: You ask AI: "Give me a study guide for the water cycle." The AI produces a polished guide, but when you compare it to your textbook you spot two factual errors and one missing stage.

Question: What is the best next step under iterative prompting?

- A. Submit the study guide as-is
- B. Throw out the response and stop using AI for school work entirely
- C. Refine the prompt with the specific corrections needed
- D. Ask the AI for a study guide on an unrelated topic instead

Correct Answer: C

Explanation: Iterative prompting is exactly this: evaluate the output against your goal (your textbook), then refine the prompt with what was wrong or missing. This also keeps the human in the loop - you decide what is correct, the AI just helps draft. Submitting as-is is the "not checking output" mistake.

Q13 [Type: FRQ - Short Answer | Difficulty: Medium | QID : 53428]

You asked AI: "Suggest a good phone."

It gave you 10 random phones at all different prices. Not helpful.

Write the next two prompts you'd use to get a real recommendation. One line each.

Model Answer: Prompt 2: "Suggest a good phone under ₹20,000 with a great camera." Prompt 3: "From those options, which one has the best battery life and is good for gaming?" Each new prompt adds missing details (budget, then specific needs) instead of starting over.

Q14 [Type: FRQ - Short Answer | Difficulty: Medium | QID : 53429]

You asked AI: "Write a caption for my photo."

It gave you a boring motivational quote. Your photo is actually of your dog being silly.

Write one better prompt that would fix this. What two things did you add?

Model Answer: Better prompt: "Write a funny, short Instagram caption for a photo of my dog doing something silly. Keep it under 10 words." Two things added: Context - what the photo is about (dog being silly); Constraints - tone (funny) and length (under 10 words).

Q15 [Type: FRQ - Scenario Analysis | Difficulty: Medium | QID : 53430]

You want AI to help you plan how to save money to buy something you want.

Fill in each part of the framework, then write the final prompt.

Model Answer: Action: Create. Topic: a savings plan to buy a ₹3,000 pair of shoes. Context: I'm a student who gets ₹500 pocket money every week. Format: a simple weekly table. Constraints: should take no more than 2 months; include small ways to save extra. Final prompt: "Create a savings plan for me to buy ₹3,000 shoes. I get ₹500 pocket money weekly. Show it as a weekly table, finish within 2 months, and include small tips to save extra money."

Q16 [Type: FRQ - Scenario Analysis | Difficulty: Medium | QID : 53431]

You want AI to teach you a new skill (cooking, drawing, coding - you pick).

Build a complete prompt using all 5 elements. Label each part.

Model Answer: Sample skill - drawing. Action: Teach me. Topic: how to draw realistic eyes. Context: I'm a beginner who can only draw stick figures. Format: step-by-step instructions with what to practice each day. Constraints: keep it to 7 days, 20 minutes a day, no expensive supplies. Final prompt: "Teach me how to draw realistic eyes. I'm a beginner who can only draw stick figures. Give me step-by-step instructions for 7 days, 20 minutes a day, using only a pencil and paper."

Q17 [Type: FRQ - Scenario Analysis | Difficulty: Medium | QID : 53433]

You want AI to help you organize your week - school, hobbies, and free time.

Use the framework. Write each element on its own line, then the final prompt.

Model Answer: Action: Make. Topic: a weekly schedule. Context: I'm in 8th grade with school 8am–3pm, football practice 3 days a week, and exams coming up. Format: a daily timetable from Monday to Sunday. Constraints: include study time, breaks, and at least 1 hour of free time daily. Final prompt: "Make a weekly schedule for me. I'm in 8th grade, school is 8am–3pm, I have football practice 3 days a week, and exams are coming up. Give me a daily timetable Monday to Sunday with study time, breaks, and at least 1 hour of free time every day."

Q18 [Type: FRQ - Scenario Analysis | Difficulty: Medium | QID : 53435]

You want AI to help you write a message to convince your parents about something (you pick what).

Build a prompt using all 5 elements.

Model Answer: Sample topic - getting a pet dog. Action: Help me write. Topic: a message to convince my parents to let me get a dog. Context: they're worried about the responsibility and cost. Format: a short paragraph I can say out loud. Constraints: respectful tone, address their concerns, under 150 words. Final prompt: "Help me write a short message to convince my parents to let me get a dog. They're worried about responsibility and cost. Make it respectful, address their concerns, and keep it under 150 words."

Q19 [Type: FRQ - Short Answer | Difficulty: Hard | QID : 53436]

Rewrite this to make it useful: "Help me get better at football."

List which elements you added.

Model Answer: Rewritten: "Give me a 4-week plan to improve my stamina and passing in football. I play as a midfielder and practice in a park 4 days a week, no gym. List daily drills with time for each." Elements added - Context: position (midfielder), where I practice (park, no gym). Format: 4-week plan with daily drills. Constraints: focus on stamina and passing, time per drill.

Q20 [Type: FRQ - Scenario Analysis | Difficulty: Hard | QID : 53439]

Someone typed: "Tell me what to say in my interview."

The AI gave generic advice like "smile" and "be confident."

(a) Name two things missing from the prompt.

(b) Rewrite it as a strong prompt.

(c) Which mistake is this? (Assuming AI understands / Incomplete info / Overloading / Not checking output)

Model Answer: (a) Missing: what kind of job the interview is for; the person's background/experience; what kind of answers they want (sample lines? tips? both?). (b) Rewritten: "I have an interview tomorrow for a part-time job at a café. I have no work experience but I'm friendly and a fast learner. Give me 5 common interview questions and sample answers I can practice." (c) Mistake: Incomplete information - the original prompt didn't tell the AI what job, what experience the person has, or what kind of help they actually needed.
